INDIGO TMT FE 550D

Indigo TMT, a prominent player in the TMT steel industry, has a rich history that spans several decades. Established in the year 2021, the company has evolved into a leading force, shaping the landscape of the steel sector. Indigo TMT had humble beginnings, emerging as a visionary journey founded by the four members. The early years were characterized by dedication and consistency, as the company navigated the challenges of the steel market.

The relentless pursuit of excellence of our company transcended borders, leading to strategic expansions. With a focus on sustainability and eco-friendly practices. Throughout our history, we have navigated economic downturns, market fluctuations, and unforeseen challenges. The company proved its ability to adapt and evolve, which showcased its resilience, ensuring a continuous supply of top-notch TMT steel even in the face of adversity.

As demand for superior-grade TMT steel surged, we seized the opportunity to expand our market reach. Strategic collaborations, both domestic and international, guided the company into new territories, solidifying its presence in the global steel market. Our unwavering dedication to customer satisfaction became a hallmark, earning the trust of builders, architects, and engineers.

FE 550D

INDIGO's FE 550D TMT bars are acclaimed for their high quality, strength, corrosion and seismic resistance, and the foundational support they provide for constructions. Based on its levels of bendability, ductility, malleability and corrosion resistance, INDIGO's FE 550D TMT bars are among the industry's highest quality standards for TMT bars.

Applications

- Nuclear Power Plants
- Defense projects
- Expressway
- Roads, bridges and flyovers
- Airports and Railways
- Ports and Metro

Rib Technology

To make sure that every Indigo TMT steel bar offers unmatched bonding with concrete, we developed the Ribs Technology that is proven to give long-lasting strength to all construction projects. The unique pattern provides ultimate structural bonding, making it the perfect TMT steel bar for residential, commercial and industrial scale projects.

ADDED STRENGTH

BETTER DUCTILITY

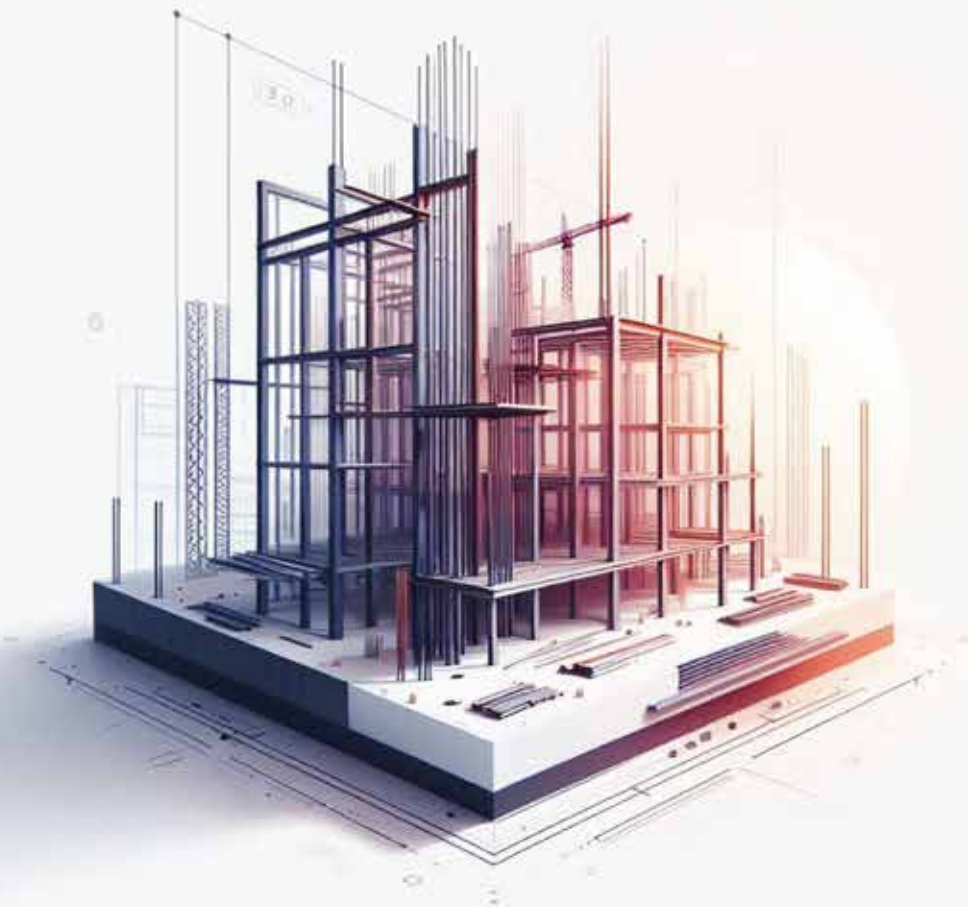

Our Products:

Available sizes

| Item |  8 mm |  10 mm |  12 mm |  16 mm |  20 mm |  25 mm |
|--------|------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------|
| Weight | 45 KGS | 49 KGS | 50 KGS | 55 KGS | 60 KGS | 45 KGS |
| Nos | 10 Pcs | 7 Pcs | 5 Pcs | 3 Pcs | 2 Pcs | 1 Pcs |

EQR German technology

We use Modern Indian Technology and German EQR Technology to produce the best earthquake shock-resistant bars to ensure your safety. With global quality standards met, Indigo TMT bars are safe for constructions involving high-rise buildings, bridges, and dams, which are highly vulnerable to earthquakes. Our distinctive technologies help reduce these impacts significantly. Our strong and secure logistical network makes it much easier to distribute to your specified location hassle-free. Our pioneering team, with expertise in industrial technologies, is able to manufacture the best-in-class TMT bars with utmost ductility and durability.

Corrosion Resistant Steel INDIGO TMT FE 550D CRS

INDIGO TMT Corrosion Resistant Steel [CRS] FE 550D TMT bars are produced with corrosion resistance elements such as copper, chromium, and phosphorus. These TMT bars have proven to be more advanced than regular TMT bars in terms of durability, flexibility, strength and life span.

Applications

INDIGO TMT FE 500D CRS bars are used in building constructions that have higher risk of corrosion due to exposure to coastal, marine or underground environments such as dams, bridges, public or private buildings and underwater and marine structures. etc

Research And Development

To meet global standards in quality, we had to pioneer a team with expertise in industrial technologies. Apart from delivering TMT bars with utmost quality, we are challenged into realizing up-to-date advancements in improvising the quality, this is done through the implementation of innovative actions. Being proficient at this, we at Indigo TMT promise to satisfy the expectations of our valuable customers.

Quality Control Certifications

Save using INDIGO TMT

Low density of Fe 550D
Indigo TMT rebars

High density of other
Fe 550 TMT rebars

Savings Up to 15%

Reduced steel
consumption

Faster
construction time

Better savings
on site

Reduced
Transport Costs

Reduced
labour costs

**Actual steel savings will depend on the design, number of floors, seismic zone and other factors based on your construction requirements.*

Testimonials

Zaid Ibrahim, United steels Trivandrum:
Strong, reliable, and well-manufactured! Indigo TMT bars are perfect for heavy-duty construction.

Nithin, New highland Kannur, Eritty:
We recently used Indigo TMT bars for our new home construction, and we are completely satisfied.

Mansoor, CTM Steel Kasaragod:
Compared to other brands, Indigo TMT bars offer superior strength and corrosion resistance.

Navas, Royal balusserry:
The bars are sturdy, well-manufactured, and provide excellent reinforcement. Definitely a great choice!

Delly, Kunnamkulam steels Thrissur:
Not only is the product top-notch, but the customer service from Indigo Steel was also excellent. The delivery was on time.

Nadrisha, Gaint steel Trivandrum:
We recently used Indigo TMT bars for our commercial building, and they exceeded our expectations.

Shaji, Vannery Thrissur:
Indigo TMT bars offer a perfect balance of affordability & strength. They are heat-resistant and ideal for heavy-duty construction.

Thadathil thattathumala Saleem:
Excellent product and service!
Indigo TMT bars provide superior reinforcement, and the timely delivery made our project hassle-free.

Nizam, Roof metals madathara kollam:
The bars are strong, corrosion-resistant, and easy to work with. They provide excellent reinforcement and durability.

Premdas V, Vam Agencies Varkala:
Indigo TMT bars are the perfect combination of strength and value. They are easy to work with, highly durable, and provide excellent reinforcement.

Gijo George, Cement house, Pampady:
Indigo TMT bars are incredibly strong and reliable. They offer excellent durability and corrosion resistance.

D Ramesh Raj, Stella Kaniyakumari:
Great quality & value! They provide superior strength and stability. The delivery was on time, and the consistency in quality is impressive.

Anees, Unity masakan, badhiyadkka, kasaragod:
I've been using Indigo TMT steel bars for my construction projects, and the quality is outstanding.

Alif Harippad, Alapuzha:
Reliable, affordable, and high-quality! Indigo TMT bars provide exceptional support and durability.

Babu, Ct Steels kalikavu:
These bars are sturdy, well-manufactured, and easy to work with. The delivery was on time, and was excellent.

Ansari, Mubarak kannur:
Indigo TMT bars are incredibly strong and durable. They provide excellent reinforcement and corrosion resistance.
